GIS Day: increasing access admin updates

- **Karly:**
  - ArcGIS has served as a case study for greater initiative to improve equity, access, and transparency with regard to CIS funded software.
  - ACS has been collecting information / documenting multidisciplinary usage to present a clearer picture of what tools people are adopting across campus.
- **2021 Updates:**
  - Working with ESRI to get increased number of seats on a trial basis
  - Setting up SSO to improve/automate user administration
  - availability for independent student/faculty exploration
- **Next chapter / Moving forward:**
  - Producing workshop materials to accommodate new users outside of GIS courses
  - Promoting ArcGIS to a teaching tool to additional faculty
  - Researching the value of ESRI//ArcGIS as a reference tool - in order to partner with additional campus stakeholders for support and education
